

REHAU WINDOW SYSTEMS

PROTECTION INSIDE OUT AND OUTSIDE IN

A global leader in polymer processing technologies

Founded in 1948, REHAU today enjoys an impeccable reputation globally for developing innovative solutions in providing a wide range of products and services to the Construction, Automotive and Industrial sectors.

With more than 15,000 employees around the globe in over 170 locations on 6 continents, REHAU offers incomparable expertise in materials development, systems design and surface technology, and an unwavering commitment to building long-lasting partnerships and alliances with our customers.

Continuing research and development enables us to consistently deliver cost-effective and environment-friendly products. Stringent quality control and safety guidelines ensure that all our products comply with the highest international standards. REHAU's products and systems for the window and door, heating and plumbing, fire protection and pipe markets complement each other in integrated high-performance solutions, representing the perfect blend of quality and innovation to inspire better living.

Why REHAU Window Systems?

REHAU is the **leading uPVC manufacturer of window profiles**. Its unique solutions comprise specially engineered designs that combine form with function better than anything you've ever seen. So every REHAU system is **as stylish as it is ingenious**, and **as attractive as it is durable**. For both practical and aesthetic reasons, REHAU ensures you of windows that work beautifully, taking care of a major factor in the success of any building project.

Quality and certification

REHAU Window Systems meet international quality and regulatory standards, and are accredited by both international and national regulation bodies.

INNOVATIVE AND VERSATILE

CATERING TO THE WIDEST MARKETS POSSIBLE

As a world leader in polymer solutions, REHAU creates PVC extrusions for windows and doors that set new standards for premium performance and distinctive design. From aesthetics to function and durability, REHAU products benefit from quality materials and the most advanced technology.

Unrivalled benefits + easy installation

REHAU Euro-Design Slide and REHAU Prestige-Design represent the **latest technological advances in window and door design.**

REHAU's extensive range meets the requirements of renovation and new construction applications in residential and commercial buildings. With nearly 60 years of expertise in product research and development, REHAU is renowned for its innovation and advanced engineered designs.

DESIGN FLEXIBILITY

REHAU offers an advanced range of window styles that can be mixed and matched for new buildings and replacement applications. All styles from inward- to outward opening, single windows to multi light windows with transoms, balcony doors, sliding windows and doors and all combination out of that can be constructed with REHAU systems. Weather it is a folding door or a French door, a tilt and turn or an arched window you are looking for: with REHAU window systems the possibilities are virtually unlimited.

ATTRACTIVE RANGE OF COLOURS

With a **wide range of colours and multiple configurations** to choose from, our windows visually enhance both the interiors and the facade of any home. REHAU have a standard range of window profiles with lamination and uses only foils that are specially engineered to withstand extreme UV radiation. The beautiful woodgrain finishes as well as the plain colours do not warp, flake or peel. There is no need for painting anymore.

EFFECTIVE SOUND INSULATION

INGENIOUS DESIGN KEEPING NOISE LOW

To concentrate at work or relax after a hard day, the one factor needed for optimum results is a peaceful and quiet environment.

Tailor-made noise protection system so nothing can disturb your peaceful world

REHAU Prestige Design is a window system perfectly designed to reduce sound transmission. The dual compression gaskets assure the tightness of the windows and doors.

Combined with suitable glazing and installed in a professional way REHAU windows can achieve a sound reduction of up to 40dB. This easily exceeds the recommended sound – proofing level for sleeping rooms even in busy town centres.

EXCEEDING RECOGNISED STANDARDS

Combined with suitable glazing, REHAU windows can **insulate interiors from sounds of up to 40dB**. This easily exceeds the recommended sound-proofing level of 30 dB for sleeping in a residential area.

Sound insulation up to 40 dB

Sound Insulation Table			
Location And Noise Pollution Level	Recommened Max. Noise Level	Recommened soundproofing Level of Window	Noise Protection Class
Residential Area about 60 dB 	Sleeping 25 - 30 dB	30 dB	2
	Housing 30 - 35 dB	27 dB	1
	Working 35 - 50 dB	14 dB	0
Town Centre about 70 dB 	Sleeping 25 - 30 dB	43 dB	4
	Housing 30 - 35 dB	37 dB	3
	Working 35 - 50 dB	35 dB	1
Industrial about 75dB 	Sleeping 25 - 30 dB	47 dB	5
	Housing 30 - 35 dB	43 dB	4
	Working 35 - 50 dB	30 dB	2

(dB) decibel is a logarithmic unit of measurement that expresses the magnitude of a physical quantity (usually power or intensity) relative to a specified or implied reference level.

Highly effective dual compression gaskets cause tightness of windows and doors, leading to excellent sound insulation!

PEACE OF MIND

SAFETY MEASURES AND MATERIAL QUALITY FIRMLY IN PLACE

Your home is your haven, which is why REHAU windows serve as an effective barrier against the intrusion of noise and unwelcome strangers.

Engineered with security for your family and your property in mind

Our profiles will accommodate most of the shootbolts and security hinges currently available on the market. Due to the Eurogroove in our sash profiles all multi point locking hardware can be installed in windows and doors to further deter burglars.

In addition the windows supplied by our fabricators and installers are internally glazed. This means the glazing beads that hold the glass in place are on the inside and cannot be removed by would-be-intruders.

SELF EXTINGUISHING

REHAU uPVC is classified as a high-impact resistant material. It is notably **difficult to ignite** and will **self-extinguish** when the source of heat is removed.

NO ROTTING, NO CORROSION, NO PAINTING

Unlike other materials, **REHAU uPVC profiles are rott-proof and resistant to atmospheric pollution**, including a range of acids and alkalis. This also means they will never rot in the manner of wooden frames over time.

HIGH WIND LOAD PERFORMANCE

The wind load capacities of REHAU Window Systems have been verified at a range of **3500 - 6300 Pa** (tested in accordance with GB/T7106-2002 and at estimated windspeeds of 270 - 380 km/h). In other words, REHAU windows are built to withstand the gustiest wind conditions, which makes them an ideal choice in highrises and coastal areas.

Able to withstand windspeeds up to 6300 Pa and signal 9* typhoon!

REHAU windows are resilient enough to shield you from even typhoons, ensuring safety and security indoors.

* According to Taiwan's storm surge classification system for the country

CLEAN INTERIORS

PERFECT PROTECTION AGAINST THE ELEMENTS

Solves the common problems of a high-rise urban home

These days, more people live in high-rise apartments that overlook vehicular traffic with all its noise and air pollution. This makes housekeeping even more of a chore. REHAU Window Systems have been **thoughtfully designed to keep out what doesn't belong in a clean and restful environment.**

FUSS-FREE MAINTENANCE

It takes only half as much time to clean tilt-and-turn windows, as their openings allow you to swipe both sides at the same time. Being made of exceptionally durable uPVC, REHAU windows are **extremely resistant to pollution, diluted acids and alkalis.** No special maintenance regime beyond the use of appropriate standard household cleaners is required. All in all, a REHAU Window System is virtually **guaranteed to help you save plenty of time and money** over the long duration of its use.

Safe cleaning inside-out with tilt-and-turn windows

DUST PROOFING

The sealing in REHAU Window Systems is calibrated to **achieve excellent air tightness of less than 0.1 m³/hr/m² @ 10 Pa** (tested in accordance with GB/T7107-2002). This effectively stops dust drifting in from the outside, which drastically **reduces the time you'll need to spend cleaning your home.**

WATER TIGHTNESS

REHAU windows incorporate an 8mm overlap between frame and sash, as well as dual compression gaskets, to prevent both dust penetration and water infiltration. They boast a **proven water tightness of at least 2 litres/min/m² @ 700 Pa** (tested in accordance with GB/T7108-2002). So your home stays absolutely dry however heavily it might be raining outside.

- 1 8mm overlap of frame and sash
- 2 Duo compression gasket

LONG-LASTING UTILITY

LOOKING GOOD AGAINST ALL ODDS

REHAU window system was selected for the Triumph Tower in Moscow, Russia for its long-lasting brilliant white appearance.

RAU-PVC:
REHAU's own formulation
for window profiles

Quality materials ensure longevity of form and function

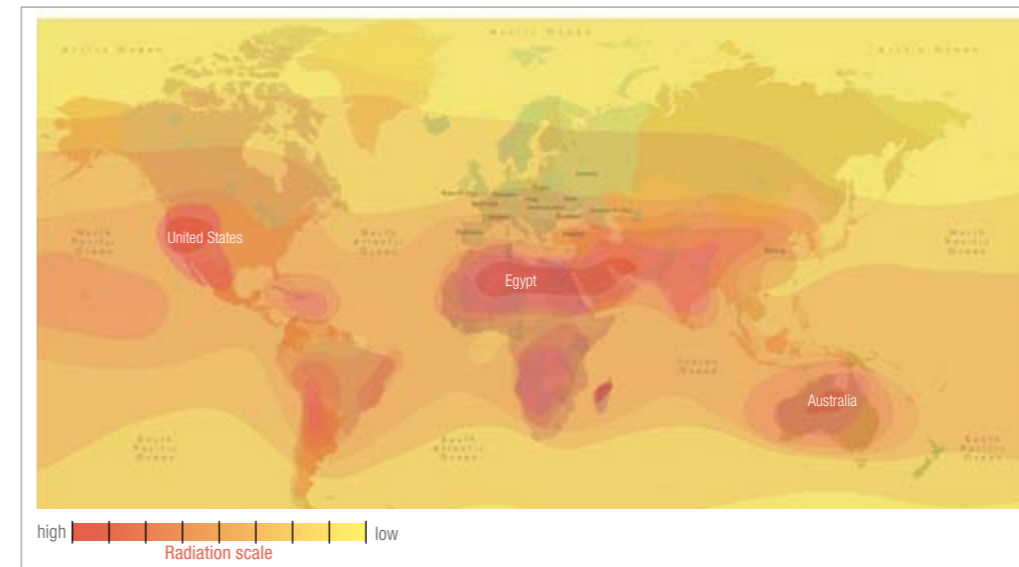

The basis for REHAU's profile quality is the use of quality compound, RAU – PVC. The recipe is the culmination of over 50 years of research and trials. Tough and impact resistant, it is ideally suited to external use.

The high quality compound used to create the renowned **REHAU smooth gloss finish** ensures that the windows stay white and retain their pristine appearance indefinitely. Of course our profiles are UV – stabilized and are able to withstand severe climatic conditions. REHAU windows are durable and will keep their looks for many years whatever the weather throws at them.

High quality and UV-stability from Australia to China to India

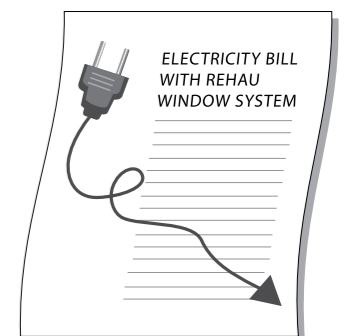

While frames made of aluminium or any other metal tend to scorch, REHAU uPVC is such a poor conductor of heat that you can lean on it comfortably and enjoy the views even on the hottest of days. More significantly, it prevents the heat outside from entering your home, thereby reducing your reliance on cooling devices such as air conditioning.

ENERGY-SAVING

REHAU windows can be installed in regions experiencing up to 180kcal/cm² per year radiation, such as the Sahara Desert or the Arctic region. They **undergo no physical trace of reduction in rigidity between -30°C and 60°C**. So the conditions of neither the Arctic region nor the Sahara Desert could ever cause a dent in any REHAU profile. Certain climatic conditions take a toll on buildings. Coastal houses, for instance, should be able to stand up to high wind loads and the corrosive effects of water. Each REHAU Window System is **specially formulated to suit the global spectrum of climates and regions**.

Energy savings you will feel in your wallet

* According to tests on double glazing glass for eight hours of air conditioning

COMPLETE PROVIDER OF QUALITY SOLUTIONS

YOUR ONE-STOP SHOP TO EXECUTE PROJECTS END-TO-END

REHAU delivers “Unlimited Polymer Solutions” and is the premium worldwide brand for polymer-based innovations and systems in building solutions, automotive and industry. We generate continuous growth through our expertise and innovative capabilities in materials development, systems design and surface technology. More than 15,000 employees at more than 170 locations around the world ensure success of our independent, privately held company.

REHAU assurance and support

REHAU is committed to excellence and quality in both its products and people. **We listen so we can offer precise and customised solutions that suit your market’s needs.**

REHAU profile systems are only fabricated by qualified specialists and according to precise guidelines and strict quality requirements. Every REHAU profile is **strictly produced according to the most stringent German engineering guidelines**, with the company certified to ISO 9001 standards.

More than just a window profile supplier, **REHAU is a total solutions provider** and offers the most comprehensive line of extruded polymer construction products available. REHAU representatives are always on hand to help solve difficult construction problems and to advise with their experience. This combination of quality and built-in technical expertise ensures made to measure results with no compromises.

NETWORK OF HIGHLY TRAINED PARTNERS AND INSTALLERS

Our regular organized technical seminars, workshops and trainings as part of our REHAU Training Academy programs are not only to help our partners to achieve greater professional competence, but also to build a close bond and network among us. Subsequent refresher and new product courses are also provided to ensure our partners stay abreast with the latest advancements in building technology and thereby improve their long-term competitiveness.

TECHNICAL SUPPORT

We recognise that a **successful solution requires the right tools, the know-how of an experienced team and the desire to create a product that exceeds customers’ expectations.** We are happy to help our partners to achieve their goals from project planning to job-site supports via the REHAU Competence Team, which you may contact through your nearest REHAU sales office listed on the back of the brochure.

24/7
local support

YOUR PERFECT LONG-TERM PARTNER

We offer you the strength of a world-leading brand of polymer-based solutions. One that is backed by **outstanding innovations, the most modern manufacturing technologies and flexible logistics.** You'll find in REHAU a future-oriented and reliable partner with a width and depth of expertise second to none.
